

VINCE DANG

EHS Specialist · HAZMAT · Audits · Incident response · Training

Sacramento, CA | (916) 634-2083 | phucdang84@gmail.com | nestinghomesolutions.com/experience
California driver license | Overtime and out-of-town travel | Available immediately

TARGET

PARC Environmental — EHS Specialist, Sacramento (\$25–\$35/hr). Support the Director of EHS: site audits, incident response, injured-employee support, training, records, and customer liaison. Seventeen years CAL FIRE in PPE, HAZMAT, confined space, heights, fire extinguishers, equipment checks, accident documentation, and 24/7 emergency work. Construction and multi-site operations since 2016. A.A. Fire Technology. Hazmat certifications strongly preferred — I hold CSTI HAZMAT FRO, DECON, and WMD. Bilingual English / Vietnamese (Spanish is preferred; I do not speak Spanish). Can work at heights and in confined spaces in PPE for long periods. Lift 50 lbs. I have not run PARC lab cartridges, ISN/Avetta, or quantitative fit-test machines yet — I will train on your gear.

THIS JOB — WHAT I ALREADY DO

- EHS / worksite audits and walk-throughs
- Accident and injury investigation; written facts
- HAZMAT FRO / DECON / WMD (CSTI)
- Respiratory protection (SCBA); decon
- Records, logs, chain-of-custody discipline
- Word, Excel; California driver license
- Inspect extinguishers, ladders, PPE, rescue gear
- Incident response; support injured people
- Confined space; heights; extended PPE
- Employee orientation and safety training
- Customer / crew liaison; calm under pressure
- Heat, cold, noise, mechanical equipment, overtime

EXPERIENCE

Firefighter / Engineer / Helitack | CAL FIRE — Mendocino Unit

2002 – 2019

17 years · 5 years helitack · 24/7 emergency · HAZMAT, PPE, audits of gear and sites

- Audited people, gear, and sites before work: fall-protection class gear, ladders, extinguishers, pumps, saws, medical/rescue equipment, and PPE. If it was not ready, it did not go.
- HAZMAT FRO, DECON, and WMD (CSTI): chemical hazards, decontamination, exposure facts, and liaison with other agencies and the public — the same customer-facing EHS role PARC runs on jobs.
- Investigated injuries and incidents; wrote what happened and the corrective action; supported injured crew through first aid (EMT-trained, Mendocino College; CPR/AED instructor; not currently a registered EMT).
- Confined Space Awareness (SFT); Rescue Systems I; Low Angle Rope Rescue; Air Rescue Hoist. Heights, confined spaces, and PPE for entire shifts. Heat, cold, dust, loud equipment.
- Respiratory protection (SCBA). Equipment checks and care (calibration-style readiness: if the meter or the bottle is wrong, people get hurt).
- Trained new hires and crews (L-180, PPE, extinguishers, survival). Kept training and incident records complete for a regulated agency.

Construction & multi-site operations | Independent

2016 – Present

Sacramento · client sites, vendors, occupied buildings

- Walked client and contractor sites: found unsafe conditions, documented them, closed them. Liaison between owners, trades, and the next person on the job.
- Word and Excel logs, photos, and short written summaries. Local travel and out-of-town work as needed. Overtime and irregular hours already normal.

EDUCATION

A.A. Fire Technology — American River College, Sacramento. Fire Academy. Related field (bachelor's preferred, not required). Hazmat and safety training as listed below.

CERTIFICATIONS (HAZMAT AND SAFETY — PREFERRED ON THIS POSTING)
